Advanced Master Gardener Training  
September 30 - October 1, 2016

Our Featured Speaker: Dr. Jim Stack

Jim Stack is Professor of Plant Pathology, Director of the Great Plains Diagnostic Network (GPDN), and Fellow of the Biosecurity Research Institute at K-State. As Director of GPDN, Stack coordinates a nine-state project for the rapid detection and accurate diagnosis of high consequence pathogens and pests. He is principal investigator on international biosecurity projects in Europe, the Middle East, South America, Australia and New Zealand. Stack’s research interests center on emerging diseases and high consequence plant pathogens in natural and agricultural plant systems. Of particular interest is the intersection of plant health, public health, and food security.

Keynote Presentation: The Plant Health-Public Health Challenge

By almost all estimates, the world will reach nine billion people by 2043 and ten billion people by 2090. Human health and wellbeing is dependent upon plant systems. The UN Millennium Ecosystem Assessment concluded that approximately two-thirds of the earth’s plant systems are threatened or endangered. Considering the dependency of humans on plants for food, medicines and wellbeing, is developing our plant systems to feed ten billion people sustainable or even desirable? No. Are the decisions that we are making today regarding globalization and plant health rational? No. Does the way we do business threaten the plant systems upon which we depend? Yes. We can produce the food to feed nine to ten billion people, but should we? Maybe not.

Information about our presenters can be found at: http://hnr.k-state.edu/extension/master-gardeners/advanced-training/2016/Instruction.pdf

1. Hands-on Tree Pruning (XL): Dr. Charles Barden
This offering will include classroom instruction on tree pruning of both the top and roots, as well as hands-on tree pruning with loppers and saws in the field. We will examine pruning cuts made by this class several years ago. Don’t miss this one if you like hands-on sessions (Limit* of 30 students).

2 & 3. Prairie Star Flowers: Past, Present and Future (S): Dr. Cheryl Boyer
Cheryl will speak about the history of the Prairie Star Flowers program (annual and perennial field/container trials), what she has learned about it in the past year, and her vision for the future of the program. Integrating Extension, Research and Teaching will be a hallmark of Prairie Star Flowers in the years to come. Industry support will be essential for continued success, but is certainly something we believe can be achieved. How can you partner with the ornamentals program at K-State? There are many, many ways—both professional and personal—come find out!

4. Pesticides and Pollinators (S): Dr. Raymond Cloyd
This class will discuss the issues associated with pesticides and pollinators including the direct and indirect effects of pesticides on pollinators (e.g. bees). In addition, the class will address concerns regarding systemic insecticides and their potential impact on pollinators, as well as, how to avoid negatively affecting pollinators with pesticides.

5 & 6. Xeriscaping—It’s Not About Rocks (S): Holly Dickman
Xeriscaping (pronounced zer-i-skaping) is a word that gets mentioned quite often during days of drought and water shortages. When listening to, or engaging in conversations regarding this topic, it becomes obvious that this word – xeriscaping – or the concept of it can be a source of confusion in some instances. This presentation will explain what xeriscaping truly means and hopefully eliminate some of the confusion.

7. Fragrant Landscape Plants (L): Gregg Eyestone
Don’t get too busy that you can’t stop and smell the roses and all the other plants that can provide nose enjoyment. This class will review the different smells the nose can perceive and many of the trees, shrubs and flowers that can provide pleasurable scents.

8. Effective Irrigation (S): Gregg Eyestone
Adequate soil moisture plays a big role in plant health. Water can also be expensive. Irrigation practices need to be best for the plant and efficient. Learn about plant roots and different tools to get water to them.

9 & 10. Raising Caterpillars for Educational Displays (S): Jackie Goetz & Team
Jackie Goetz will present a slide program outlining the life cycles of Butterflies and Moths, an introduction to characteristics and behavior, and basics of rearing them for Educational Dis-
plays. Members of Jo Co EMG Gardening for Wildlife Habitat Committee will share experiences of caring for and displaying caterpillars to include live, hands-on displays. Live critters will be available in class for handling. Resources (including a copy of a butterfly guide) will be supplied to familiarize Kansas EMG’s from all counties with their local butterflies, larval host plants, and nectar sources. ($5 fee for butterfly guide, limit of 25 per class)

11. American Elms; Poised for a Comeback (S): Dr. Jason Griffin
Since the 1930’s American elm and Dutch Elm Disease have been synonymous. Generations have learned the American elm is not a good tree. It is time to un-learn that stereotype. Decades of luck and focused breeding efforts have yielded several American and hybrid elms that are attractive, durable, and resistant to Dutch Elm Disease. This class will discuss some of the breeding history and the ‘new’ cultivars.

12 & 13. Common Turfgrass Weeds: Identification and Control (S): Dr. Jared Hoyle
This class will be an active approach to weed identification in turfgrass systems. Students will identify live specimens in a natural field setting. Once identified the class will then be presented information pertaining to control options in home lawns situations. Weed control options presented will include cultural and chemical methods.

14. Your Gardening Personality (S): Lenora Larson
All gardens do not look the same because all gardeners are not the same. We each garden for our own reasons, driven by our psychological needs. This presentation uses three personality assessment tools to help attendees better understand their motivations and style. Photographs of gardens designed by different personality types illustrate the psychological impact of who we are on what we do in our gardens. At the conclusion, participants should be more confident in their gardening identity —and more tolerant of those with a different gardening style.

This class will run until 5:15 pm on Friday

15. Dispelling the Myth: Trees Heal Wounds (S): Dr. Cathie Lavis
Trees can not restore injured tissue like animals or humans, in the same spatial area. When trees are injured and infected they chemically strengthen their boundaries. During this class you will learn more about this defense process called "compartmentalization," and how trees respond to injury. (Limit 20)

16 & 17. Dealing with Deer Damage (S): Charles Lee
We will discuss how to recognize and properly respond to complaints of deer damage in gardens, crops and landscapes.

18 & 19. Insects in the Garden (S): Lynn Loughary
The buzz is to create a habitat for beneficial insects, including pollinators. We will talk about creating landscapes with plants that will attract these insects season long. We will also identify those beneficials that are commonly found in our gardens.

20 & 21. What’s New (and Old) in Tomatoes (S): Dr. Chuck Marr
There have been many improvements in tomatoes that are advantages to commercial growers and hobby gardeners alike. This class will focus on some of the developments that have been made with tomatoes and what limitations still remains in variety improvements. Some general aspects of growing conditions for tomatoes will be discussed as well.

22. Mulching Mayhem - The Facts About Mulching (S): Matthew McKernan
Do you know the power of mulch? Prevent weeds, save water, and get 2-3 times the amount of plant growth, just by mulching! But only if it is done correctly.... Learn about the power of correct mulching techniques, and discover how to achieve these benefits in your own yard or garden today.

23. Less Common Fruit (S): Rebecca McMahon
Curious about quince? Juiced up about jujubes? Wondering if a nectarplum or peacotum is a real thing? This is the class for you! This class will explore a range of less common fruit trees and bushes. We will discuss why they are less common and what it might take to successfully grow them in Kansas.

24. Tissue Culture for Dummies...Like Me (S): Rob Mortko
Many gardeners have heard of tissue culture and may even appreciate that most new plant cultivars are commercially propagated using this method. But what is tissue culture and how does it work?

While not a do-it-yourself project for most backyard gardeners, Rob’s background in chemistry and engineering coupled with an interest in horta kindled his curiosity about this topic. His recent retirement from an engineering career afforded him the opportunity to start-up his own tissue-culture lab where he has had to address many of these same questions. The presentation will include a behind-the-scenes look at what goes on in a hosta tissue culture lab.

25. Campus Tree Walk (L) : Evelyn and Bob Neier
Kansas State University recently celebrated its 150th anniversary and we are proud to say we are the FIRST Land Grant College in the United States. Early records refer to an orchard of apples, pears, plums and cherries that was planted along with some ornamental trees. Lace up your walking shoes and join us on a tour of campus. We’ll point out some of the historical trees, as well as some of the more unusual trees that make the campus such an amazing place. (Limit: 25)

26. Ornamental Campus Disease Walk (S): Judy O’Mara
Enjoy the fall weather and take a walk around the K-State campus. We will look at common landscape problems and talk about how to do problem solving on-site. This is a fun class for new Master Gardeners and for those who work the hotline.

27. Growing Mushrooms at Home (S): Pam Paulsen
We will cover methods for cultivating edible mushrooms as well as the types of mushrooms that work best for growing at home.
28. **Exploring Kansas Bucket List** (S): Pam Paulsen
Kansas has many unique, natural areas to visit. Come along for a virtual tour and explore the beauty of our state.

29. **Growing Thornless Blackberries in Your Landscape** (S): Everett Price
Growing Blackberries can be a fun, rewarding and “berry” delicious. We will be discussing ways to plant your blackberries for maximum production and beauty in your landscapes. We will also cover maintaining, harvesting and storing blackberries. If you like lots of blooms, pollinators and blackberries, come and join us.

30. **Backyard High Tunnels** (S): Cary Rivard
High tunnels are one of the best ways to extend the growing season. Learn the tips and tricks in getting the most out of this versatile growing structure.

31 & 32. **Leaf Rubbing: It’s Not Just for Kids Anymore** (S): Gail Selfridge
A hands-on workshop that combines the art of leaf-rubbing with the science of leaf identification and why leaves change colors. This leaf rubbing presentation can be used as a single activity for 4H and scout groups, garden clubs, etc. or in conjunction with more extensive Master Gardener outreach events such as garden shows.

33. **On the Lookout for Exotic Invasives** (S): Jennifer Smith
Ever wonder how Japanese beetle got here, or what disease will plague the landscape and our native forests next? This class will discuss pathways for plant pests and take an in-depth look at insects, diseases, weeds, and other pests that plant regulatory officials would like to keep out of Kansas.

34 & 35. **'Worm Your Way In’; A Complete Guide to Vermicomposting** (S): Theresa Stephens
Composting with worms (vermicomposting) is an easy project that can be done indoors and year-round. The end result is simply the best compost available for your plants and garden. Learn how to build your bin, where to get your worms, what and when to feed them and how to harvest the finished compost. This class will impart all the knowledge needed to 'worm your way' into the fabulous world of vermicomposting.

36. **Growing Beautiful Roses -or- Growing Roses with Great Success . . . . .** (S): Cindy Vadakin
I encourage gardeners to select roses that have been tested and proven to be disease and pest resistant and adaptable to their zone (Sedgwick County is in zone 6b). I provide the information needed to effectively fight pests and diseases, while helping the gardener realize that these steps are often unnecessary if the right rose has been chosen. Site selection and planting, choosing the best cultivars, and the best pruning methods will also be covered in this presentation on general rose care.

- The “S” after the class title signifies a “short” class (1.25 hours), an “L” means a 3 hour class, and “XL” signifies extra long and covers 3 class periods.
- **“Limit”** is maximum allowed to take the class. If you want to increase your chances of getting a class that is repeated, mark it as your first choice on both time periods. We will do our best to get you in and insure you are not placed in the same class twice.

**Plants Available:** We will again be offering plants to Master Gardeners. There are no set prices but a bucket for donations will be provided. The plants are located in Greenhouse 102C.

The entrance to the greenhouse is from the second floor of Throckmorton Hall to the north. We will have signs that will point you to the greenhouse as well as to the correct bay, 102C, inside the greenhouse. The plants will be available from 4:30 to 5:30 pm on Friday, September 30 and 12:30 to 1:30 pm on Saturday, October 1.
**Registration and General Information**

YOUR REGISTRATION MATERIALS FOR THE CONFERENCE MUST BE RECEIVED BY SEPTEMBER 2, 2016. THIS INCLUDES THE REGISTRATION FORM AND THE CLASS SIGN-UP SHEET. THIS CONFERENCE CAN ONLY ACCOMMODATE 300 PEOPLE SO PLEASE REGISTER EARLY.

The $135 full conference fee includes lunch on Friday, refreshment breaks, and conference handouts. The refreshment breaks on Friday will be light refreshments; Saturday morning refreshments are beverages only. The $90 Friday only fee includes the luncheon, refreshments and handouts for September 30. The $50 Saturday only fee includes morning beverages and conference handouts for October 1. Friday lunch will be in the K-State Alumni Center. Extra luncheon tickets may be purchased (see registration form for prices).

Initial registration check-in will take place on Thursday, September 29 from 4:30–5:30 p.m. in the Holiday Inn lobby. Registration will continue Friday morning from 8–9 a.m. in the Alumni Center.

A full refund, less a $15 administrative fee, will be available if notification of cancellation is received by Kansas State University Conferences and Noncredit Programs by 5 p.m. on Friday, September 16, 2016. Fees will not be cancelled if you do not attend and do not notify the conference registration office by the cancellation deadline. To cancel your registration, or for other registration questions, please call 1-800-432-8222 or (785) 532-5569 between 8 a.m. and 5 p.m. Monday through Friday, or email registration@k-state.edu.

You may register in one of these ways:

Online: Go to [https://outreach.ksu.edu/etrakWebApp/meetings.aspx](https://outreach.ksu.edu/etrakWebApp/meetings.aspx) and select “Register Now” for Advanced Master Gardener.

By Mail: send completed forms, along with your payment, purchase order number, or credit card information, to the address listed on the registration form

By Fax: fax completed forms, along with credit card information or purchase order number, to (785) 532-2422

In Person: bring completed forms, along with payment, to the address listed on the registration form between 8 a.m. and 5 p.m., Monday through Friday.

**Special Assistance**

A participant with a disability who needs accommodations or who has special dietary requirements should indicate services needed at the time of registration. If you have questions or need additional information, please contact Brandi Nelson, conference coordinator, at nelsonbm@k-state.edu or call 785-532-2546 or 800-432-8222. Notification by September 16 is requested to ensure accommodations can be provided in a timely manner.

**Notice of Nondiscrimination**

Kansas State University is committed to nondiscrimination on the basis of race, color, ethnic or national origin, sex, sexual orientation, gender identity, religion, age, ancestry, disability, military status, veteran status, or other non-merit reasons, in admissions, educational programs or activities and employment, including employment of disabled veterans and veterans of the Vietnam Era, as required by applicable laws and regulations. Responsibility for coordination of compliance efforts and receipt of inquiries concerning Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act Discrimination Act of 1975, and the Americans With Disabilities Act of 1990, has been delegated to the Director of Affirmative Action, Kansas State University, 214 Anderson Hall, Manhattan, KS 66506-0124, (Phone) 785-532-6220; (TTY) 785-532-4807.

**Location and Parking**

The K-State Alumni Center will be the location for the keynote and lunch on Friday. Breakout sessions will be held at the Alumni Center and Throckmorton Hall. All classes on Saturday will be in Throckmorton Hall.

Round trip shuttle service will be available on Friday for those staying at Four Points. Hotel shuttle runs will be from 7:45–8:30 a.m., and from 4:30–5 p.m. Shuttles will also be available throughout the day to transport conference participants between the Alumni Center and Throckmorton. No shuttle service will be provided on Saturday.

If you plan to drive to campus on Friday, you must purchase a parking permit from parking services. Current rates are $1.50 per hour or $12 per day. Parking processes are being updated, so you will receive additional information on reserving your parking permit with your confirmation letter.

Limited parking is available at the Alumni Center, and a permit is not required to park in these lots. These stalls are available on a first come, first-served basis. If you are staying at the Holiday Inn, we encourage you to walk across the street to the Alumni Center.

Additional shuttle and parking information will be sent with registration confirmation materials.

**Pre-Conference Shopping**

Manhattan has three nurseries that Master Gardeners may be interested in visiting.

**Blueville Nursery** Full service nursery with garden center.
4539 Anderson Avenue, [http://www.bluevillenursery.com/](http://www.bluevillenursery.com/)

**Horticultural Services** Full service nursery with garden center.

**Friday Evening**

Scott McElwain, the director of the KSU Gardens, will lead a tour of gardens from 6:00 pm to 7:00 pm. Many changes have taken place in the last few years. Come see the progress that has been made. We will meet in the Gardens at 6:00 pm. [http://www.k-state.edu/gardens/](http://www.k-state.edu/gardens/)
Class Registration Form
2016 Advanced Master Gardener Training
September 30 & October 1, 2016

Name: _____________________________________________________________

County Master Gardener Program: ___________________________________

1. All classes will be assigned when registration is received on a first-come, first-served basis.
2. You will receive a printout of your class schedule after the end of the registration period but before you arrive in Manhattan.
3. Certain classes may have limited registration based on room size or support material limitations.
4. Any class with fewer than 5 participants will not be offered and participants assigned to an alternative choice class.

Select 1st, 2nd and 3rd choice class choices for each class period. Remember that long classes use both early & late class times. Refer to class times on Class Schedule sheet. Place the number of the class you wish to take in the form below.

Dear Extension Master Gardeners:
This program is designed to enhance the learning opportunity for the Kansas counties that have Master Gardener volunteers assisting local Extension programs. You will have a chance to select from a variety of classes, see the K-State campus, the development of the University Gardens, our plant science building, Throckmorton Hall, and meet Master Gardener volunteers from around the state. We will have a visiting out-of-state speaker and outstanding classes taught by K-State faculty, industry personnel and Master Gardeners.

We hope to see you September 30—October 1!

Sincerely,
Ward Upham
Extension Associate
State Master Gardener Coordinator
